

Xerox DocuPrint® N4525™ Speed Test Against the HP 8150

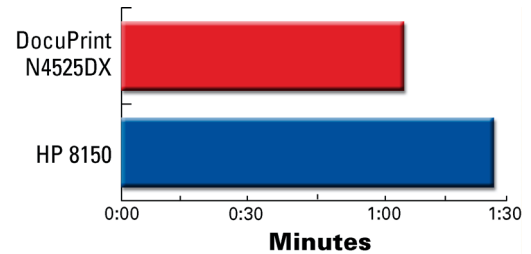

Test Results:

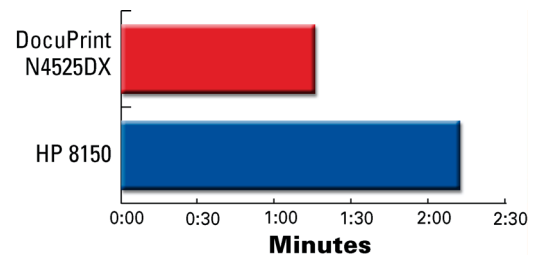

Total Print Time

Simplex

Duplex

Key Advantages: DocuPrint N4525 vs. HP 8150

- **Faster** than HP's 8150 — (45 ppm vs. 32 ppm)
- **Twice as fast** duplex print speed – (39 ppm vs 19 ppm)
- To match the **productivity** of one DocuPrint N4525 – costing around \$3,000 – you would need two HP 8150s totaling \$4,800
- **2.5 times faster** First Page Out Time (4 sec. vs. 14 sec.)
- Can handle up to **67% more pages** per month (250,000 vs. 150,000 monthly duty cycle)

Test Files:

The file is a Microsoft Word document consisting of 49 pages. The document was printed in simplex mode to a PostScript file using current manufacturers PostScript drivers for all products.

PC and Connection:

The PC is running Windows 98 or 2000. The network consists of a 10/100BaseT network interface card, a 10/100 hub and category 5 cables. The network is operating at 10/100 megabits.

File Sending Process:

At the push of a button, all test files are automatically moved into the Windows print spool folder. Once in the Windows print spooler, Windows automatically sends the files simultaneously to the target printers. This process removes any possibility of human error during file transmittal.
