

PHASER™ 5400 LASER PRINTER

The Phaser 5400 laser printer from Xerox comes with a very impressive combination of specifications. We held nothing back to build the best possible black-and-white network printer for your workgroup.

With a powerful processor, plenty of memory and a long list of performance-enhancing features, it can handle all the volume a busy workgroup can send to it—at a stunning 40 ppm print speed.

The 5400 is a versatile printer. That's why you will find it's just the printer you need everyday. It reliably handles all types of jobs on all types of media, even labels, card stocks and transparencies, and prints them any custom size you like up to ledger. Advanced print functions and 1200 x 1200 dpi resolution means you can call upon the 5400 to do all of your highest-quality printing.

In fact, with its superior speed, performance, resolution, and paper handling, the Phaser 5400 acts like a big departmental printer with one exception: It sports a very affordable network-printer pricetag.

maximum speed and performance

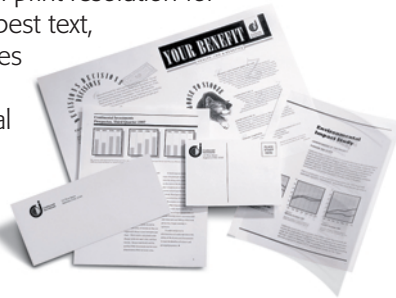

The Phaser 5400 is optimized for performance printing thanks to a host of standard features.

A 266 MHz Power PC G3 class processor gives the 5400 a level of robustness you just won't find in other printers.

It prints at top speed: 40 pages per minute with a 9 second first-page-out time. It speeds through high volume jobs, multiple sets, and complex jobs containing photos and charts.

WorkSet features like *Send Once/RIP Once/Print Many*, and job pipelining ensure that your job prints with brisk efficiency, even in heavy network traffic. And for really large jobs, standard *Automatic Tray Switching* and *Load-While-Run* features mean you don't have to worry about the paper running out in the middle of a job.

You can take advantage of true 1200 x 1200 dpi print resolution for the sharpest text, finest lines and the best tonal ranges in scanned photographs.

best overall value

The Phaser 5400 comes fully equipped with the best possible combination of features available on a network printer, making it an exceptional value.

10/100Base-TX Ethernet, USB, true Adobe PostScript 3 and 32 MB RAM (expandable to 192 MB) are standard.

All of our WorkSet convenience and productivity tools, including *Secure Print*, *N-up Printing*, *Booklet Printing*, and *MaiLinX email printing*, are included to help you with your varied printing tasks.

For remote enterprise-level printer management, CentreWare Web software makes it easy for IT administrators to install, configure, obtain reports, and troubleshoot all Xerox and non-Xerox network devices simultaneously.

CentreWare IS Embedded Web Server provides simple printer management. Save time with configuration cloning and automatic installation, set up MaiLinX email alerts, and access consumables status, printer configurations, and automated support.

Designed-in quality and dependability are backed by a full one-year on-site warranty and Xerox Total Satisfaction Guarantee.

versatility and flexible paper handling

With unparalleled paper handling ability and an array of configuration options, the Phaser 5400 is versatile enough to excel in any office environment.

Its sturdy design allows precise printing on the widest range of media types, handling paper weights from 16 lb. bond to 110 lb. card stock. Even envelopes and labels can be printed from the main tray, so there is no need to buy special feeders. And to improve printing quality on heavier stocks, the printer enables variable fusing temperatures.

Print on page sizes from postcard to ledger and custom sizes in-between.

Automatic 2-sided printing, standard on DT and DX models, is fast and saves paper.

The Phaser 5400N comes with a 500-sheet input tray **1**, 150-sheet multipurpose bypass feeder **2** and a 500-sheet output tray **3**. The DT configuration adds automatic 2-sided printing and a ledger-size 500-sheet feeder **4** for a total capacity of 1,150 sheets. To this, the DX configuration adds a second ledger-size 500-sheet feeder boosting paper capacity to 1,650, plus a hard disk and extra memory for additional printer functionality.

Multiple paper handling options are available to configure the 5400 the way you want. Add one or two 500-sheet feeders **4** to make your printer even more productive. The most performance-focused workgroups can add a 2,000-sheet feeder **5** and a 1,000-sheet Output Stacker **6**. Expand to a maximum input of 3,150-sheets of varied media and 1,500-sheets output.
