# Using a specific application

Note     *For hints and tips on printing from a specific application, request a document catalog from HAL or EuroHAL, the Tektronix automated fax systems.*

## QuarkXPress

To use the printer with QuarkXPress 3.11, 3.2, or 3.3, use the installer application to install the *Phaser 340.PDF* printer description file.  Once the file is installed, the printer's name appears alphabetically in the list of installed printers in the QuarkXPress custom **Page Setup** dialog box.

## Other applications

To use the printer with Aldus PageMaker 5.0 or FreeHand 4.0, and other applications, use the installer application to install the *PPD* printer description files.  Once the files are installed, you can use them to set up the LaserWriter 8.x driver (or another PPD-driven printer driver) for your printer.
